🏆 RECOMMENDATIONS

GameCourse - Daniel Gonçalves 🔗

04/2026

As part of the Er3bUs Red-Team, we conducted a vulnerability assessment to GameCourse.

📁 PROJECTS

CTF Platform 🔗

2026

A kubernetes platform to host CTF challenges to assist STT's weekly meetings.

AE ESAQ 🔗

01/2022 – 2025

A website and mobile app for my former school's Student Association (AE).

AzSat 🔗

05/2024

I co-developed a can-sized satellite module for the CanSat 24 competition.

My contributions included working with Arduinos (C++), developing a Java app, a React-based web app and real-time telemetry between the module and the website.

Our team was awarded the Ground Station award from ESERO and the Antenna award from ANACOM.

Hotspot Toolbox

02/2021 – 2024

An Android app with automation features for network sharing.

🛡️ CYBERSECURITY

TEAM Portugal - European CyberSecurity Challenge

2025

STT - IST's CyberSecurity Team
